These standards are designed not only to safeguard individual health but also to maintain a safe and productive working environment across all Saudi Aramco operations. Adhering to these requirements is mandatory for all employees, contractors, and visitors who require medical clearance before commencing work. Understanding the comprehensive nature of these standards is essential for anyone involved in the recruitment, onboarding, or ongoing employment within Saudi Aramco projects.

Overview of Saudi Aramco Medical Standards

Saudi Aramco's minimum medical standards serve as a benchmark for evaluating an individual's health status to ensure they are fit for work in demanding environments such as oil fields, refining plants, and offshore platforms. These standards are aligned with international health and safety regulations, tailored to the unique operational needs of Saudi Aramco, and are regularly updated to incorporate advances in medical science and safety protocols.

The key objectives of these standards include:

- Ensuring the safety of employees and the workplace.
- Preventing health-related disruptions or accidents.
- Promoting overall well-being among the workforce.
- Complying with local and international health regulations.

Core Components of the Medical Standards

The Saudi Aramco minimum medical standard requirements encompass a broad spectrum of health assessments, laboratory tests, and examinations. These components collectively determine an individual's medical fitness for employment.

1. Medical History and Physical Examination

A thorough review of personal medical history is conducted to identify any pre-existing conditions that could impact job performance or safety. The physical exam typically includes:

- Vital signs assessment (blood pressure, pulse, temperature, respiratory rate)
- General physical assessment
- Evaluation of the cardiovascular, respiratory, neurological, musculoskeletal, and other systems
- Review of immunization history

2. Laboratory and Diagnostic Tests

To complement the physical examination, several laboratory tests are mandatory:

- Complete Blood Count (CBC)
- Urinalysis
- Blood glucose levels
- Hepatitis B and C screening
- HIV testing
- Chest X-ray (especially for candidates in high-risk roles or with specific medical histories)
- Tuberculosis screening (e.g., Mantoux test or IGRA)

3. Vision and Hearing Tests

Since many roles require good sensory functions, vision and hearing assessments are essential:

- Visual acuity testing (distance and near vision)
- Color vision testing
- Hearing assessment (audiometry)

4. Specific Medical Conditions and Fitness Criteria

Certain health conditions may require additional evaluation or may lead to disqualification if they pose a safety risk:

- Cardiovascular diseases (e.g., uncontrolled hypertension, arrhythmias)
- Respiratory conditions (e.g., uncontrolled asthma)
- Musculoskeletal limitations
- Infectious diseases
- Mental health assessments, where applicable

Minimum Medical Standard Requirements for Different Roles

While the core standards apply universally, specific roles may have additional medical requirements based on their occupational hazards and physical demands.

1. Office and Administrative Staff

Typically, these roles require basic health clearance, focusing on:

- General fitness
- Vision and hearing standards
- No communicable diseases

2. Field and Offshore Workers

Due to the physically demanding and high-risk nature of their work, standards are stricter:

- No significant cardiovascular or respiratory conditions
- Good physical fitness and stamina
- Ability to work in confined or remote environments
- Additional tests like stress tests or pulmonary function tests if needed

3. Engineers and Technical Staff

Require comprehensive health assessments similar to office staff but with added emphasis on:

- Musculoskeletal health
- Vision and hearing acuity

4. Medical and Safety Personnel

Must meet higher standards of physical and mental fitness, including:

- No history of mental health conditions that could impair judgment
- Good physical health to perform rescue or emergency procedures

Process for Medical Clearance

Attaining medical clearance involves a systematic process that ensures adherence to Saudi

Aramco's standards.

- **Pre-Employment Medical Screening:** Candidates undergo initial medical examinations and testing at designated clinics or hospitals approved by Saudi Aramco.
- **Medical Evaluation:** The examinations comprehensive review by licensed physicians to evaluate all health parameters.
- **Medical Certification:** If the candidate meets the standards, a fitness certificate is issued, valid for a specified period.
- **Periodic Re-evaluations:** Employees are subject to regular health assessments to ensure ongoing fitness, especially for roles with high health risks.

Importance of Compliance and Consequences of Non-Compliance

Compliance with Saudi Aramco's minimum medical standards is mandatory. Failure to meet these standards may result in:

- Disqualification from employment opportunities
- Requirement for further medical treatment or rehabilitation
- Delay in onboarding process
- Potential restrictions on work assignments until fitness is restored

Non-compliance not only affects individual employment but also poses safety risks to colleagues and the overall operational environment. Therefore, strict adherence and transparency during health assessments are emphasized.

Updates and Revisions to Medical Standards

Saudi Aramco regularly reviews and updates its medical standards to reflect:

- Advances in medical science
- Changes in occupational health risks
- Feedback from medical professionals and safety audits
- Regulatory changes in Saudi Arabia and internationally

Candidates and employees are advised to stay informed about the latest standards through official communication channels and to prepare accordingly.

productivity, or environmental integrity. The standards also align with international occupational health and safety protocols, ensuring that Saudi Aramco remains compliant with global best practices.

Pre-Employment Medical Examination (PEME)

The cornerstone of Saudi Aramco's medical standards is the Pre-Employment Medical Examination (PEME). This comprehensive assessment aims to evaluate the candidate's overall health status to determine their suitability for the demanding operational environment.

Key Components of PEME

- Medical History Review: A detailed inquiry into past medical conditions, surgeries, chronic illnesses, medication history, and any previous occupational health issues.
- Physical Examination: Includes vital signs measurement, cardiovascular assessment, respiratory evaluation, musculoskeletal inspection, and neurological checks.
- Laboratory Tests:
 - Complete Blood Count (CBC)
 - Urinalysis
 - Blood glucose levels
 - Liver and kidney function tests
 - Infectious disease screening (e.g., HIV, Hepatitis B and C)
- Specialized Tests (if applicable):
 - Audiometry
 - Chest X-ray
 - Electrocardiogram (ECG) for certain roles

Fitness Classification

Based on the PEME results, candidates are classified into categories such as:

- Fit for duty: No health concerns; eligible to commence employment.
- Temporary unfit: Requires follow-up or treatment before clearance.
- Unfit: Not suitable for employment in the current role; may require reassessment or medical clearance.

This classification ensures only those with an acceptable health profile participate in high-risk or physically demanding roles, reducing the likelihood of health-related incidents.

Immunization and Vaccination Requirements

Saudi Aramco mandates specific immunizations to prevent the spread of communicable diseases within the workplace, especially given the diverse origins of its workforce.

Core Vaccines

- Hepatitis B: To prevent hepatitis B virus transmission.
- Measles, Mumps, Rubella (MMR): Ensuring immunity against common viral infections.
- Tuberculosis (TB): Screening and BCG vaccination where applicable.
- Influenza: Annual vaccination, particularly for employees in high-exposure environments.
- COVID-19: As per global health guidelines, vaccination may be required, especially during pandemic periods.

Additional Vaccinations

Depending on the role and location, other vaccines such as yellow fever, typhoid, or meningococcal vaccines may be recommended or mandated.

Documentation and Verification

All immunizations must be documented through valid vaccination certificates, which are verified during the pre-employment screening process. Employees found lacking required immunizations may receive vaccinations on-site or be deferred from certain roles until vaccination is completed.

Periodic Medical Surveillance and Monitoring

Saudi Aramco emphasizes continuous health monitoring beyond initial employment screening. Regular medical surveillance ensures early detection of health issues that could impair safety or productivity.

Routine Health Assessments

- Annual or Bi-Annual Medical Checks: Includes physical examinations, laboratory tests, and health questionnaires.
- Specialized Screenings: Vision and hearing tests, lung function tests, or other assessments based on job requirements.
