presentation, diagnostic approaches, and management strategies. This article provides a comprehensive overview of key facts, focusing on critical aspects that nurses should know to deliver effective patient care, facilitate early detection, and support ongoing management.

Introduction to Gastrointestinal and Liver Diseases

The gastrointestinal tract and liver are integral to digestion, nutrient absorption, detoxification, and metabolic regulation. Diseases affecting these organs can range from acute infections to chronic degenerative conditions, often presenting with overlapping symptoms such as pain, nausea, and abnormal laboratory findings. Recognizing these conditions promptly is vital for improving patient outcomes, reducing complications, and providing targeted interventions.

Understanding the Gastrointestinal System

The GI system encompasses the mouth, esophagus, stomach, small intestine, large intestine, rectum, and anus. It functions to digest food, absorb nutrients, and eliminate waste. Disorders can involve any segment and may be inflammatory, infectious, neoplastic, or functional.

Common GI Disorders Relevant to Nurses

- Gastroesophageal Reflux Disease (GERD): Chronic reflux of stomach acid causing esophageal irritation.
- Peptic Ulcer Disease: Ulcers forming in the stomach or duodenum often due to *Helicobacter pylori* or NSAID use.
- Irritable Bowel Syndrome (IBS): A functional disorder characterized by abdominal pain and altered bowel habits.
- Inflammatory Bowel Disease (IBD): Includes Crohn's disease and ulcerative colitis, with chronic inflammation.
- Gastroenteritis: Infectious or non-infectious inflammation of the stomach and intestines.

Nurses should be familiar with symptom recognition, hydration status assessment, and supportive care strategies for these conditions.

Key Facts about Liver Diseases

The liver performs vital functions, including metabolism, synthesis of clotting factors, detoxification, and bile production. Liver diseases often have systemic implications and can progress silently until advanced.

Major Liver Diseases Every Nurse Should Know

- Hepatitis (A, B, C, D, E): Viral infections causing liver inflammation.
