The exam thus tested not only factual recall but also higher-order thinking skills.

Major Studies and Theories Featured in the 2013 TZ2 Paper

Biological Approach: Neuroplasticity and Brain Research

One key focus was on neuroplasticity ? the brain's ability to reorganize itself by forming new neural connections. The paper examined studies like:

- Magnetic Resonance Imaging (MRI) studies on London taxi drivers, which demonstrated structural changes in the hippocampus related to spatial navigation.
- Research on brain damage and recovery, such as the case of Phineas Gage, highlighting how specific brain injuries can alter personality and behavior.

These studies underscore the importance of biological substrates in understanding behavior and cognition.

Sociocultural Approach: Conformity and Cultural Influences

Another critical area was the influence of culture and social norms. The paper referenced studies such as:

- Asch's conformity experiments (1951), which showcased how group pressure can influence individual judgments.
- Cultural dimensions like collectivism vs. individualism, as studied by Hofstede, illustrating how cultural values shape behavior.

Students were expected to evaluate these studies critically, considering factors like ecological validity, ethical issues, and cultural biases.

Ethical Considerations and Methodological Limitations

A significant component was evaluating the ethical considerations of studies. For example:

- Milgram's obedience experiments raised questions about deception and informed consent.
