What Is a Situational Judgement Test (SJT)?

Definition and Purpose

A Situational Judgement Test is a psychometric assessment designed to evaluate how candidates approach work-related scenarios. Unlike knowledge-based tests, SJTs focus on assessing personal attributes, judgment, problem-solving abilities, and interpersonal skills. The primary goal is to determine whether a candidate can make appropriate decisions in realistic situations that reflect the work environment within European institutions.

In the context of European institution competitions, SJTs are used to:

- Assess candidates' diplomatic and ethical decision-making
- Gauge their ability to handle complex policy or administrative dilemmas
- Evaluate interpersonal skills such as communication, teamwork, and conflict resolution
- Identify candidates who demonstrate cultural sensitivity and adaptability

Why Are SJTs Important in European Institution Recruitment?

European institutions operate within a unique multicultural, multilingual, and multi-stakeholder environment. Therefore, assessing a candidate's judgment in real-world scenarios is crucial for ensuring they can perform effectively in such settings. SJTs help recruiters select individuals capable of balancing diverse interests, acting ethically, and making informed decisions under pressure.

- **Rating or Ranking:** Candidates are asked either to select the most appropriate response(s) or to rank the options from most to least suitable.
- **Answer Key or Scoring:** Responses are scored based on predefined ideal or acceptable behaviors, often derived from European Commission or EU staff guidelines, ethical standards, and best practices.
