- Relevant: Align with overall health objectives.
- Time-bound: Set within a defined time frame.

Steps in Formulating Short-Term Goals

- Assess the Patient Thoroughly

Gather comprehensive data on the patient's current health status, including physical, psychological, social, and spiritual aspects.

- Identify Priority Problems

Determine which issues require immediate attention based on severity and impact on overall health.

- Set Realistic Goals

Based on assessment findings, establish goals that are attainable within the short period.

- Collaborate with the Patient

Incorporate patient preferences and readiness to ensure goals are meaningful and motivating.

- Document Clearly

Use precise language to specify what, how, and when the goal should be achieved.

Types of Short-Term Goals in Nursing Practice
