Question What are the main differences between prokaryotic and eukaryotic cells? Prokaryotic cells lack a nucleus and membrane-bound organelles, are generally smaller, and have a simpler structure. Eukaryotic cells have a nucleus, membrane-bound organelles, and are more complex, found in plants, animals, fungi, and protists. **Answer** How does the process of photosynthesis convert light energy into chemical energy? Photosynthesis captures light energy using chlorophyll in the chloroplasts, converting carbon dioxide and water into glucose and oxygen through a series of light-dependent and light-independent reactions, storing energy in chemical bonds. What is the significance of the cell cycle and mitosis in organism growth? The cell cycle, including mitosis, ensures accurate replication and division of cells, allowing organisms to grow, develop, repair tissues, and maintain proper function by producing genetically identical daughter cells. How do enzymes facilitate biological reactions? Enzymes are biological catalysts that lower the activation energy of reactions, increasing the reaction rate without being consumed, thus enabling vital processes to occur efficiently at body temperatures. What role do DNA and RNA play in genetic information transfer? DNA stores genetic information used for inheritance, replication, and gene expression, while RNA acts as a messenger and functional molecule in protein synthesis, translating genetic code into functional proteins. Why is biodiversity important for ecosystems? Biodiversity enhances ecosystem resilience, stability, and productivity by providing a variety of genes, species, and habitats, which support essential ecological functions and adaptability to environmental changes. What are the key differences between aerobic and anaerobic respiration? Aerobic respiration requires oxygen and produces more ATP, carbon dioxide, and water. Anaerobic respiration occurs without oxygen, yielding less ATP and producing alternative byproducts like lactic acid or ethanol depending on the organism.
