- **Correlational Research:** Examines relationships between variables without implying causation. Example: Studying the correlation between education level and income.
- **Experimental Research:** Tests hypotheses by manipulating variables to observe effects, often in controlled environments. Example: Clinical trials.
- **Qualitative Research:** Provides in-depth understanding of phenomena through non-numerical data like interviews and observations.
- **Quantitative Research:** Uses numerical data to quantify variables and analyze patterns statistically.

Research Process Overview

The research process generally follows these steps:

- **Identifying the Problem:** Clearly define what you want to investigate.

- **Mixed-Methods Research:** Combines qualitative and quantitative approaches to leverage the strengths of both, offering comprehensive insights.

The Research Process

A typical research process involves several interconnected steps:

- Identifying the Problem: Clearly define what you want to investigate.
- Reviewing Literature: Study existing research to understand the current state of knowledge.
- Formulating a Hypothesis or Research Question: Establish what you aim to test or explore.
- Designing the Study: Decide on methods, sampling, and tools.
- Collecting Data: Gather information through surveys, experiments, observations, etc.
- Analyzing Data: Interpret the collected data to draw conclusions.
- Reporting Findings: Share results through reports, publications, or presentations.
- Applying Results: Implement insights to inform practice, policy, or further research.

Core Concepts in Data Analysis

Data analysis transforms raw data into meaningful insights. It involves a series of processes that help answer research questions, validate hypotheses, or uncover trends.

Types of Data

Data can be categorized primarily into:

- Quantitative Data: Numeric data such as measurements, counts, or ratings.
- Qualitative Data: Descriptive data like interview transcripts, open-ended survey responses, or visual observations.
